Results of Vision Screening

Dear Parent,

Your child _____ was **screened** on _____, at _____ for possible vision problems by trained volunteers from the _____ Lions Club.

No serious vision problems were detected, but it is important to realize this screening **does not** replace the need for a professional eye examination.

Lions Clubs and other organizations such as the American Academy of Pediatrics recommend vision screenings and professional eye examinations as part of regular health examinations for children.

If the box "Unable to Screen" is checked that means that for some reason we were not able to screen your child today. This has nothing to do with the condition of your child's eyes. Please have your child participate in a future screening event.

If you have any questions about this screening, please feel free to contact

Sincerely,

Unable To Screen.
