

MD5M Lions KidSight Results of Vision Screening

Dear Parent,

Your child _____ was screened on _____, at _____

for possible vision problems by trained volunteers from the Lions Club.

While this screening is not diagnostic nor performed by certified health personnel, **it did suggest that your child should be further examined by an eye care professional such as an optometrist (O.D.) or ophthalmologist (M.D.). The screening today indicates that your child's vision is not within normal range for his or her age.**

The Lions Club conducting the screening may contact you within 2-3 weeks to determine if you were able to make an appointment with an eye care professional or if you need assistance.

If you do not have an Eye Care Provider you may want to check with your Primary Care Provider and/or your Health Insurance Provider for a referral or you can use the following resources:

- For an Optometrist: <http://www.infantsee.org>
- For an Ophthalmologist: <http://doctor.webmd.com/find-a-doctor/specialty/ophthalmology/minnesota>. Select Pediatric Ophthalmology in the dropdown section.

Lions Clubs and other organizations such as the American Academy of Pediatrics recommend vision screenings and professional eye examinations as part of regular health examinations for children.

If you have any questions about this screening, please feel free to contact

Sincerely,

Note: The results of the screening may be attached or printed on the back of this form. We suggest that you present this information to the eye care professional at the time of the exam.
